Connecting the React app with a backend API using REST.

Collaborated with team members to achieve target results.

EDUCATION

2024 Certificate of Higher Education General Science

Beirut International School - Beirut, Lebanon

PROJECTS

Full-Stack Todo Application

Technologies: React, TypeScript, Node.js, Express.js, REST API, Git

- Built a full-stack Todo application with CRUD functionality.
- Connected the React frontend to a Node.js/Express backend using REST APIs.
- Implemented state management with React Hooks and persistent data using local storage where appropriate.
- Used Git and GitHub for version control throughout development.
